SUMMARY

Final-year Computer Science Engineering student with hands-on experience in full-stack development, machine learning, and AI-powered applications. Proficient in Python, Flask, MERN stack, RESTful APIs, and database systems, with a strong foundation in data structures and algorithms demonstrated through solving 1000+ coding problems. Passionate about developing scalable software solutions and contributing to real-world engineering challenges.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

Aditya University, Surampalem

CGPA: 9.03 / 10

Expected May 2027

Diploma in Computer Engineering

BVC College of Engineering, Palacharla

Percentage: 92.77%

2021 – 2024

SKILLS

Languages: Python, Java, JavaScript

Web Development: Flask, React.js, Node.js, Express.js, HTML, CSS

AI/Machine Learning: Machine Learning, TF-IDF, Scikit-learn

Database: PostgreSQL, SQLAlchemy, MongoDB, MongoDB Atlas, SQL

API & Tools: REST APIs, Gemini API, Git, GitHub, VS Code

Concepts: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

PROJECTS

Fake Job Detection System (2026) — Python, Flask, Machine Learning, Gemini API

- Developed an AI-powered web application to detect fraudulent job postings and assess job legitimacy in real time.
- Trained and evaluated Machine Learning models with TF-IDF feature extraction, achieving over 98% classification accuracy.
- Built Flask APIs and an interactive web interface for job verification, risk analysis, and user-friendly result visualization.
- Integrated Gemini AI with website and social media analysis, combining ML predictions, AI evaluation, website credibility, and presence scores into a unified fraud detection and risk scoring system

Personalized Academic Resource Recommendation Platform (2026) — Python, Flask, NLP, Gemini AI, PostgreSQL

- Developed an AI-powered academic recommendation platform that analyzes syllabus PDFs and generates learning resources.
- Implemented NLP-based topic extraction using Gemini AI to identify and organize course topics from uploaded syllabi.
- Built a full-stack Flask application with user authentication, resource management, and PostgreSQL database integration.
- Integrated YouTube and educational APIs with a personalized recommendation engine based on user interactions and preferences.

EXPERIENCE

Software Trainee Intern - HQL Edu Tech Pvt. Ltd.

Nov 2023 – May 2024

- Identified and resolved critical bugs across multiple modules, improving application stability.
- Documented system workflows and technical processes to support maintainability and team collaboration.
- Participated in code reviews and daily stand-up meetings to improve code quality and team productivity.

MERN Stack Intern – Aims Technologies

May 2025 – July 2025

- Developed responsive front-end components using React.js, improving user interaction and UI performance.
- Built backend services using Node.js and Express.js to handle API requests and data processing.
- Integrated RESTful APIs and optimized backend logic, reducing API errors by 30%.
- Collaborated with backend and frontend teams to ensure smooth API integration and application functionality.

ACHIEVEMENTS

- Solved 1000+ DSA problems across LeetCode (400+), CodeChef (500+), and GeeksforGeeks (400+).
- Participated in 30+ coding contests; achieved Top 35% ranking on LeetCode and a 2 rating on CodeChef.
